

IDAHO STANDARDS POLICY STATEMENTS
GRADE 1
SCIENCE

Standard 1: Nature of Science

Students explore the process of scientific investigation through observations and data collection, using standard and non-standard units of measurement. Students follow multi-step instructions and work with others.

Standard 2: Concepts of Physical Science

Students describe properties of common objects and how movement is a change of position.

Standard 3: Concepts of Biology

Students describe the life cycles of living things and how they survive in their environment.

Standard 4: Earth and Space Systems

Students describe characteristics for each season and the cycle of the seasons.

Standard 5: Personal and Social Perspectives; Technology

Students describe characteristics of the local environment.
