

**IDAHO STANDARDS POLICY STATEMENTS**  
**GRADE 2**  
**SCIENCE**

**Standard 1: Nature of Science**

Students identify questions that can be answered through observation, collection, recording, and analysis of data. Students explain that the shape of an item is determined by its function. Students follow multi-step instructions, work cooperatively and use communication skills.

**Standard 2: Concepts of Physical Science**

Students describe objects by their properties and explain the effect motion has on an object.

**Standard 3: Concepts of Biology**

Students list the basic needs of animals.

**Standard 4: Earth and Space Systems**

Students describe weather conditions.

**Standard 5: Personal and Social Perspectives; Technology**

Students compare man-made and natural environments. Students identify scientific tools.
