

IDAHO STANDARDS POLICY STATEMENTS
GRADE 6
SCIENCE

Standard 1: Nature of Science

Students gather evidence to differentiate between predictions, observations, and inferences. Students read, give, and execute technical instructions.

Standard 2: Concepts of Physical Science

Students compare and contrast elements, compounds and mixtures. Students explore the effects of force and energy on objects.

Standard 3: Concepts of Biology

Students understand the building blocks of organisms.

Standard 4: Earth and Space Systems

Students understand and explain the relationship among the systems on Earth, such as solid earth, oceans, atmosphere, and organisms.

Standard 5: Personal and Social Perspectives; Technology

Students identify issues for environmental studies and understand the difference between renewable and nonrenewable resources.
