12B7 1ST READING ADOPT 2335P HEALTH ENHANCEMENT

The new legislation requiring parent permission for instruction on any topic that falls within the legislative definition of human sexuality also directs parents/guardians to complain to the board or its designee if such instruction is provided without parent permission. It also directs boards to adopt a policy on investigating such complaints, but it does not provide much detail on what this process should entail. The ISBA has provided a model process for such complaints and their investigation for your consideration.
