

The Multimedia Class at Kimberly Middle School is seeking donations to help build the Video Production portion of our curriculum. Currently we have only 2 working video cameras. It is impossible for 30 students to use only 2 cameras to complete their projects. Usually, we have the students use their phones to film, but many students don't have phones. Additionally, it is difficult for students to get the videos from their phones onto the computers.

What we need:

- Old smartphones with working cameras
- Old Working Point and Shoot Digital Cameras
- Old Working Video Cameras
- Ring Lights

Why We Need Them:

- Filming Videos in Class
- They will make it easier to keep students on task
- Easier to moderate what students are working on
- Enables all students to complete individual film assignments
