

Kimberly School District #414
SPECIAL MEETING/WORKSESSION - TUESDAY, JUNE 7, 2022
INSTALLATION OF 48" PIPE OLSENSIDE PROPERTY

In exchange for the school district taking on the canal easement, the developer to the south of the district's Olsenside property will install a 48" pipe from Emerald to the southwest corner of the property. The canal company would like to run the ditch from the southwest corner north and eliminate the ditch in the middle of the property. Due to the elevation, a 48" pipe will need to run 300 ft from the southwest corner into an open ditch constructed by the canal company on the west property line of the property. This will eliminate the ditch that runs through the middle of the property.
