KSD Technology Department Report
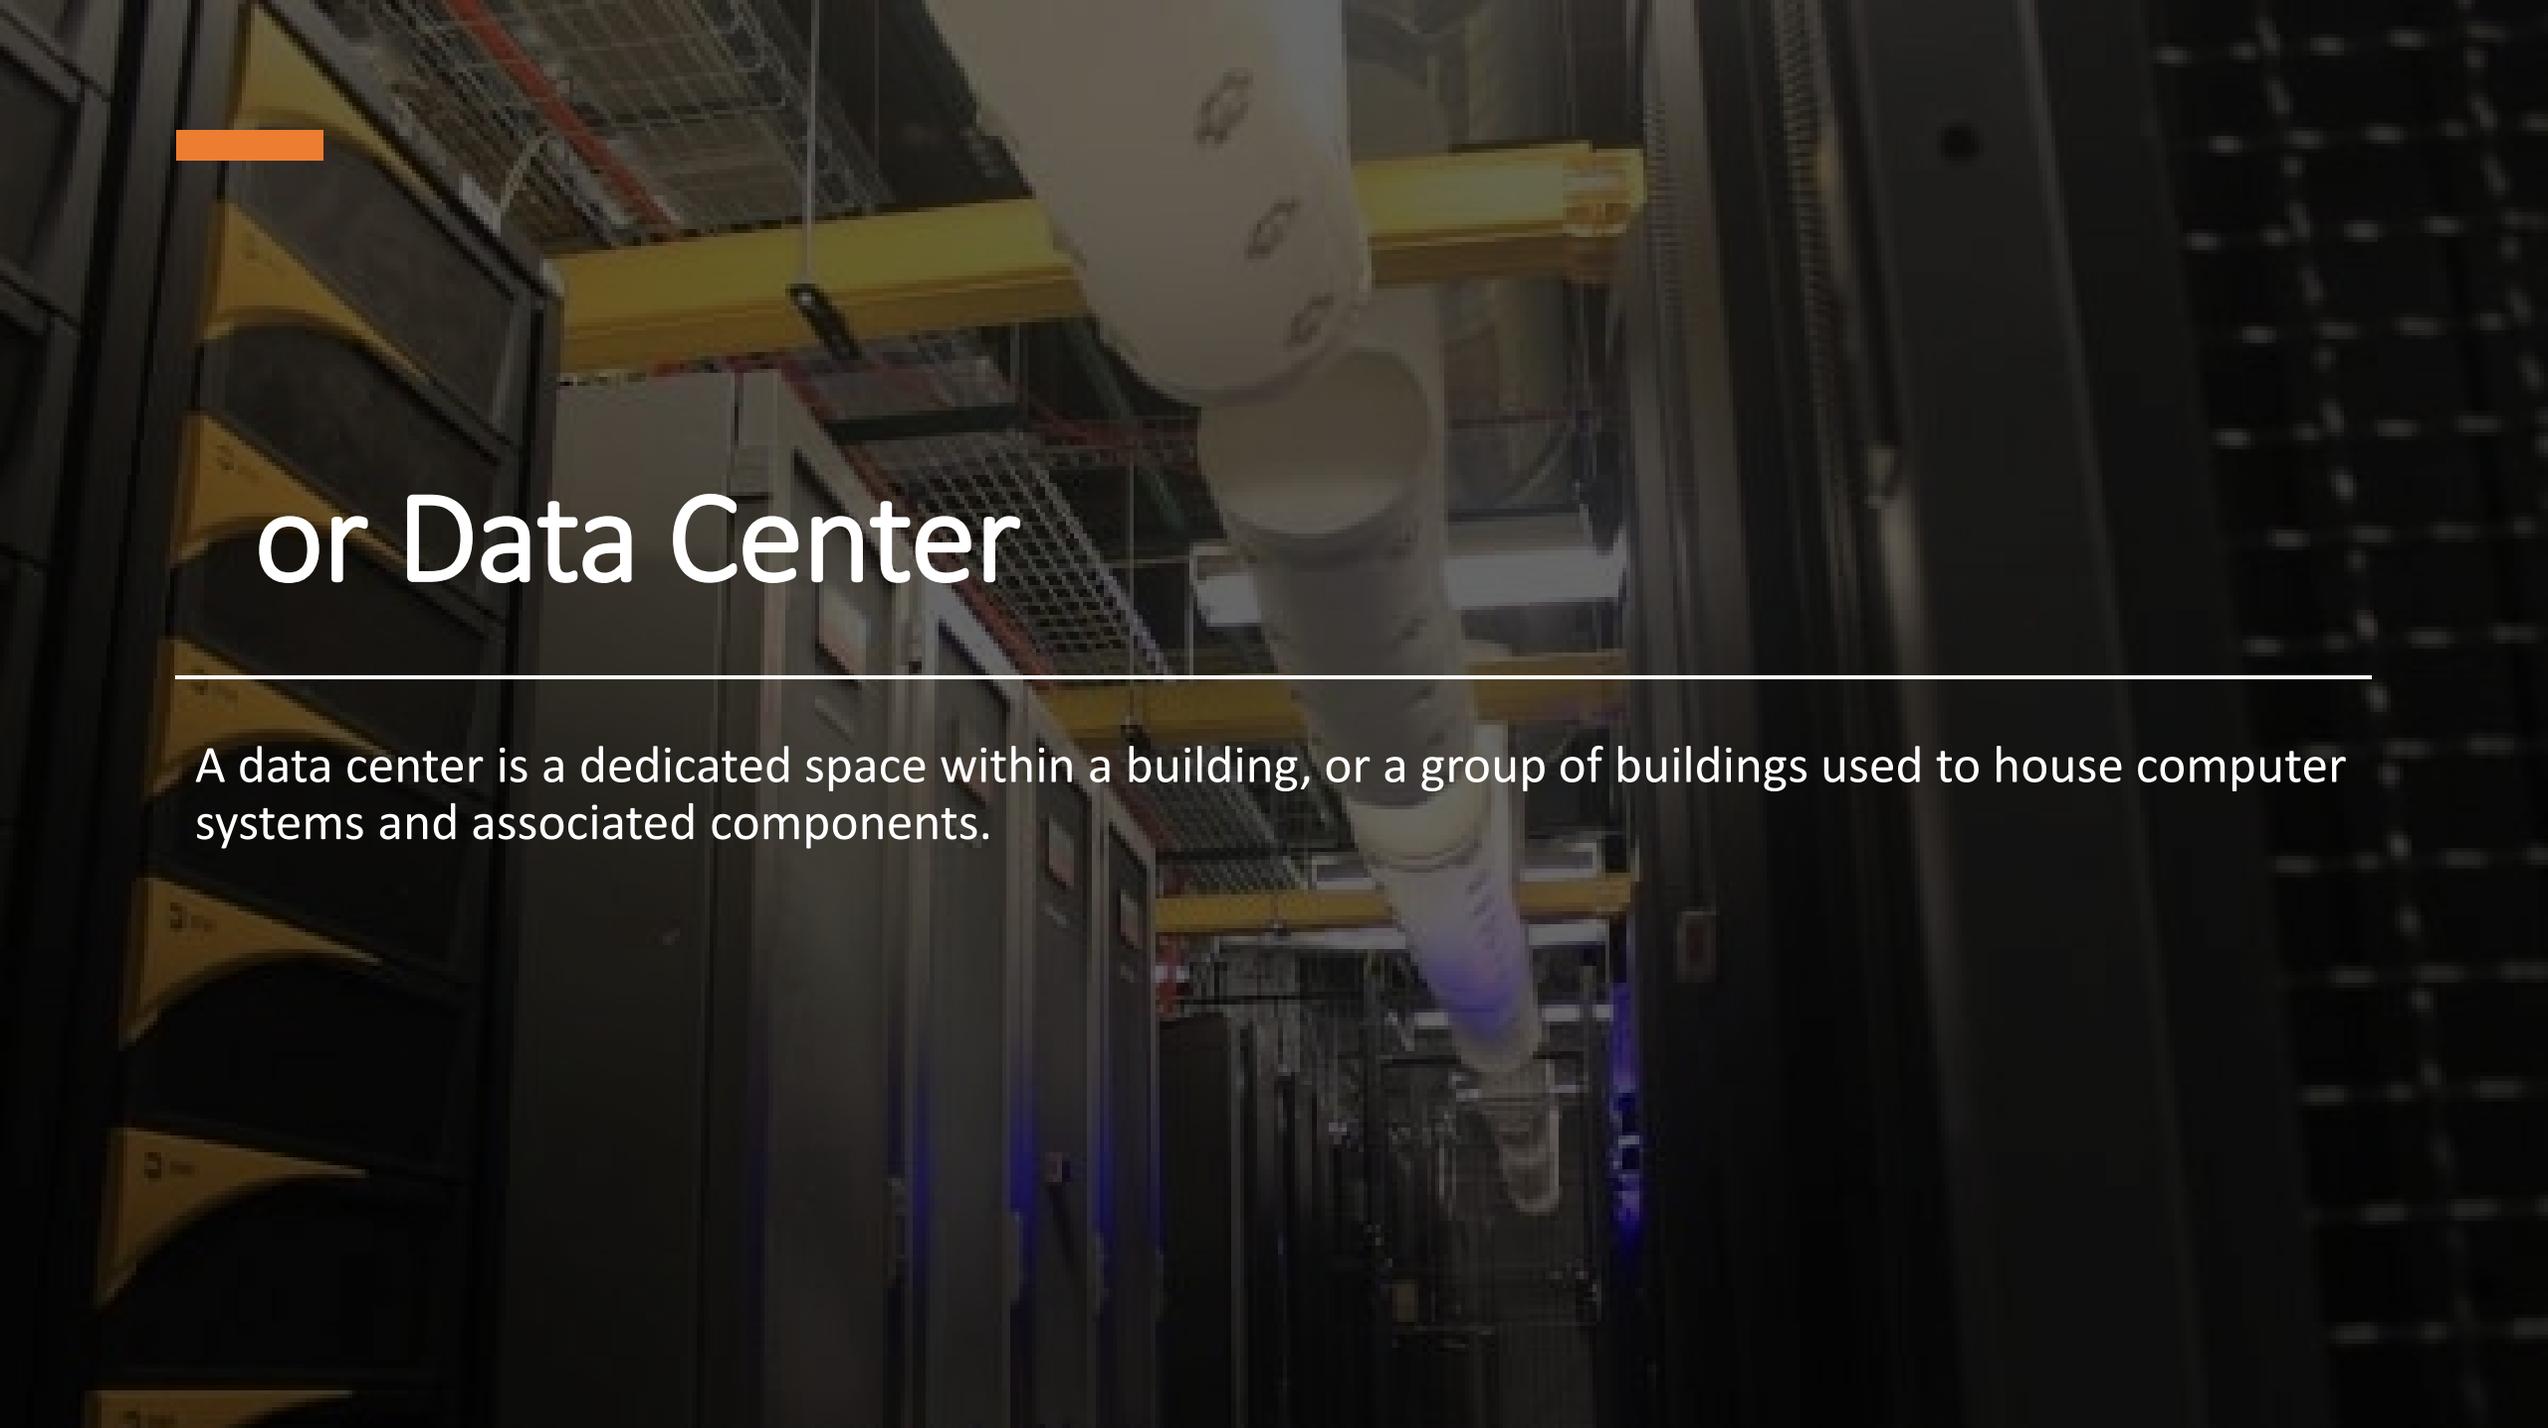

2021-2022

On Premise

On-premise servers are owned and maintained by district and can only be accessed with proprietary hardware within the building.

or Data Center

A data center is a dedicated space within a building, or a group of buildings used to house computer systems and associated components.

Vendor Hosting:

PowerSchool

TylerTech
(Accounting/HR)

Quickbooks

Reduces required IT resources for server management/Maintenance

Reduces required IT resources for application monitoring and maintenance

Eliminates the need to have a secure, redundant, physical space within the data center for the platform infrastructure

Reduces the risk of security vulnerabilities and malicious activities

Reduces the risk of data loss and data continuity
