### **Board Report September 17, 2019**

The cleaning crew did a great job of cleaning the buildings in preparation for another school year!

We are striving to keep the buildings clean. We have two custodians on restricted duty and one is off after surgery. We are looking for a part time, temporary person to help us keep up with the cleaning.

The maintenance department seal coated and re-painted several of the parking lots and paved playgrounds during the summer. We were busy moving and rearranging furnishings even after school started.

We have about one more month for irrigation. We will be mowing until about the end of October.

The two modular classroom buildings were moved from the elementary campus to the middle school and high school campuses.

Ted Wasko
