Board Report

Here we are, mid-October! We have finished irrigation for the year. We will be blowing out the irrigation system during the first full week of November.

The need for mowing has slowed down, considerably. Now we enter the season of keeping up on the removal of tree leaves from the lawns.

The custodial crew has been doing their best to keep up with the cleaning. We have had some absences lately that have slowed them down a bit.

Next week we will be changing the tires on the tractor from the summer turf tires to the weighted traction tires, in preparation for the winter and snow removal.

Ted
