BOARD REPORT

March 16, 2020

We have mowed the baseball and softball fields once. We probably won't need to repeat for a couple more weeks. We have put away most of the snow removal equipment for the season. We need to remove the snow blade and install the mower deck on the mower at Stricker Elementary.

The custodians have been cleaning and disinfecting desks and other frequently touched surfaces. We will get caught up and ahead over the next couple of weeks.

The electrical work has begun on the new home for the Tech Department. They will be moving into room number 58 in the Round Building. We are having a new, wider door installed also. We should be ready for them to move in by the end of May.

Ted Wasko
