Safety bussing zones: Kimberly is up this year to re-evaluate the safety zones. For next year's routes.

1. Route 1
2. Route 2
 - a. Sageview – This is marked a private road at the entrance. We were going into this because we had a student with an IEP for pick up and drop off they have now graduated. The student we have in here now is a middle school student that lives at the beginning of the lane and most of the time we go down and no rider.
3. Route 3
4. Route 4
5. Route 5
6. Route 6
 - a. VanBuren & Jackson – This section is marked no trucks. We have had to back the bus out of this corner a numerous amount of times this past year. This is a very narrow roadway. We are backing around a blind corner with students on the bus.
7. Route 8
 - a. Mill Creek Subdivision – When we did the safety bussing approval last year it included this subdivision. I would recommend that we take it out of the safety zone as there is nowhere for the students to walk safely.
8. Route 9

These are subject to change as we are still enrolling riders today.
